

WE TRAIN YOU FOR
A BETTER TOMORROW.

REDBIRD
FLIGHT TRAINING

ABOUT US

Redbird Flight Training Academy is the largest flight training organization in India imparting Commercial pilot license training (DGCA Approved) to aspiring Cadets. The academy was founded in the year 2017 with its first maiden flight in July 2020. We have actively been in business- the last 4 years now, and factually conclude that within a short time span, we have diversified from a 4 aircraft fleet to a 49+ aircraft fleet! The diverse fleet includes Cessna and Tecnam Trainee Aircraft, thus offering a comprehensive training experience to our aspiring pilots. The academy unveiled five bases in India, namely- Baramati - Maharashtra, Lilabari - Assam, Gulbarga - Karnataka, Belgaum -Karnataka & Seoni - Madhya Pradesh. Marking a significant leap in its commitment to aviation training in the region, the academy has extended its reach beyond Indian borders with the inauguration of a new base internationally in Columbo, Sri Lanka. As a part of our further expansion, we plan to add new fleet of trainee aircraft to our existing fleet which will enhance the training experience for our cadets. This in turn will securely prepare aspiring pilots for their careers in aviation!
